THE GREEN TECHNOLOGY EXPO

USABLE PACKAGING

About USABLE PACKAGING

Launched in June 2019, the USABLE PACKAGING project – funded by the Bio-Based Industries Joint Undertaking (JU) under the European Union’s Horizon 2020 Research and Innovation programme - aims to **reduce the use of environmentally harmful fossil-fuel-based packaging by developing high-performance bio-alternatives derived from food industry by-products**, to cover packaging and product needs for the food, drinks, pharmaceutical and clothing industries.

A consortium of 25 partners representing businesses, universities, research centres, trade associations and other organisations from all over Europe worked together on the project, led by Spain’s Consejo Superior de Investigaciones Cientificas (CSIC).

Agenda

END OF PROJECT CONFERENCE

9th November 2022, 10.00-13.00 CET

Ecomondo Expo, Rimini, Italy

Noce Room, West Hall, Pavilion (Padiglione) A6

USABLE PACKAGING

10:00- 10:30

USABLE PACKAGING Overview - initial aims and objectives

José María Lagarón – CSIC-IATA

10:30-10:50

Sustainable Production routes of pure PHAs biopolymers

David Bolzonella - INNOVEN

10:50-11:15

Biobased packaging products generated within The USABLE PACKAGING project

José María Lagarón – CSIC-IATA

11.15-11.30

Coffee break

11.30- 12:15

Achievements and future perspectives for USABLE PACKAGING

Fabiana Fantinel - INNOEXC

12.15- 12.25

Short talk - "Our Struggle, the path to sustainable fashion"

Alba Garcia - Cache Croche

12.25- 13.00

Panel discussion: End-users perspective: thoughts on circular economy strategy

Chair: David Newman - BBIA

Panellists: Alan Werker - Promiko AB; Alba Garcia - Cache Croche;

Colin Miles - Biotechnology and Biological Sciences Research Council;

Giacomo Canali – Barilla; Fabiana Fantinel – InnoExc
